Subject: RE: Funds for GIS support

Derek,

I going to initiate a new IA with GSA for Hurricane work? Are you OK with this?

Subject: Re: Funds for GIS support

This would strictly pay for labor hours worked on hurricane response tasks. As such, it should be a different appropriation so as not to be combined with SF non-Site work (which gets included in SF indirect costs). It will ultimately be charged to FEMA, via the funding line provided under the MA.

Hope this helps,

Derek

> We have used this every time in the past. It is listed under section 4.5. If we cannot add FEMA MA funds to this, we shot ourselves in the foot majorly. During disasters, this is a critical component. I am not aware of any restriction on adding another type of funding to this MA that would not be part of Superfund. Other programs, like Water, Multimedia, etc., yes, but there should not be restrictions on funds from programs under the Superfund umbrella. If that isn't the case, we have a problem.

>>> THANKS! Have you ran this thru Lisa? We need to identify a standardize flow or process for requirements for change in the SOW/PWS for the contracts and subsequently the funding to support proposed change and prevent duplication if possible. I know you're busy and would welcome a call when you have a moment.

>>> We have existing funds on the current option year for GIS. Off the top of my head, there should be enough to run through, or close to the end of calendar 2017. Please verify that as I may be incorrect. At any rate, we have a request in to have that contractor work over the weekend to support the REOC. It is within the SOW as they have supported us on disasters since before I started at EPA and it was included in the current contract. The concern I have is that we will need to get funding added to that IA sooner rather than later, given that this need for additional support probably isn't going away any time soon.
